

AJAY KUMAR D

AI & Data Science Student — Full-Stack Developer

Kanchipuram, Tamil Nadu — +91 8072753848 — ajay872072@gmail.com

Career Objective

Motivated Artificial Intelligence and Data Science undergraduate with hands-on experience in full-stack development, web technologies, networking, databases, and machine learning. Seeking an opportunity to apply programming and problem-solving skills to develop practical software solutions while continuously enhancing technical expertise.

Education

Jeppiaar Institute of Technology	2023 – 2027
B.Tech in Artificial Intelligence and Data Science	CGPA: 7.53
Anderson Higher Secondary School, Kanchipuram	2023
Higher Secondary Certificate (HSC)	72%
Anderson Higher Secondary School, Kanchipuram	2021
Secondary School Leaving Certificate (SSLC)	Result: All Pass

Technical Skills

Programming: Python, C (Basics), SQL, JavaScript
Frontend: React.js, HTML5, CSS3 **Web Development:** Basic Flask
Databases: MySQL, SQLite, MongoDB **Machine Learning:** Scikit-learn
Data Processing: Pandas, NumPy **Networking:** Networking Basics
Tools: VS Code, MS Excel, Windows Environment, Cisco Packet Tracer

Projects

Personal Full-Stack Developer Portfolio

Developed a responsive portfolio website showcasing technical skills, education, projects, certifications, and achievements. Implemented project showcases, certificate viewing, resume access, responsive design, and a functional contact section.

FoodRescue – Surplus Food Redistribution Platform

Developed a full-stack platform connecting food providers with NGOs for surplus food redistribution. Implemented role-based access, food listings, search and claims, quantity management, pickup management, notifications, and admin monitoring.

University Hostel Management System

Developed a web-based hostel management system for student records, room allocation, complaints, and fee monitoring. Implemented an interactive dashboard and centralized database to improve data accuracy and reduce manual administrative work.

Network Monitoring and Analysis System with Cisco Network Simulation

Developed a network management system using Python, Flask, SQLite, and Cisco Packet Tracer. Implemented device inventory, connectivity testing, subnet calculation, ARP/MAC analysis, logging, VLANs, trunking, inter-VLAN routing, and DHCP.

Certifications

- **University Hostel Management System – Industry Project** – TCS iON Applied Industry Projects (AIP), Tata Consultancy Services, 2026 (90 Hours)
- **Networking Basics** – Cisco Networking Academy, 2026
- **Teliport Season 3 – Participation** – Tata Elxsi, 2026
- **Learn SQL for Oracle Databases – Using Toad From Scratch** – Infosys Springboard, 2025
- **International Online Technical Workshop on Collaborative Intelligence** – Federation of Economic Development Association (FEDA), 2026
